Portfolio

Currently updating projects

• Personal Information

I'm a Full-Stack MERN Developer specializing in building modern web applications using MongoDB, Express.js, React, and Node.js. I focus on creating scalable backend systems and responsive user interfaces with clean architecture and modern UI/UX practices.

• My Skills

Frontend

JavaScript • TypeScript • React.js • TailwindCSS • Shadcn/MUI

Backend

Node.js • Express.js

Database

MongoDB • Mongoose

UX/UI

Figma

• My History

2020-2022

Freelance

Freelance web developer working on small to medium websites, primarily using WordPress with page builders such as Elementor and WPBakery.

2023/2024

Front-End & UX/UI – Semos Academy

Completed a one-year Front-End and UX/UI development academy at Semos, where I learned JavaScript and PHP as the main technologies, including developing custom WordPress plugins. After graduating, I continued expanding my skills by learning React.js and modern frontend libraries.

2024

Web Developer – Advalue

Started my professional career as a Web Developer at Advalue Marketing Agency, building and maintaining websites for various client projects.

2025/2026

MERN Stack Developer – Semos Academy

Completed a one-year MERN Stack development academy at Semos, learning to build full-stack applications using MongoDB, Express.js, React, and Node.js.
